

ANIMAL HUSBANDRY AND VETERINARY SCIENCE

PAPER—II

Time Allowed : Three Hours

Maximum Marks : 200

**QUESTION PAPER SPECIFIC INSTRUCTIONS**

**Please read each of the following instructions carefully  
before attempting questions**

There are EIGHT questions in all, out of which FIVE are to be attempted.

Question Nos. 1 and 5 are compulsory. Out of the remaining SIX questions, THREE are to be attempted selecting at least ONE question from each of the two Sections A and B.

Attempts of questions shall be counted in chronological order. Unless struck off, attempt of a question shall be counted even if attempted partly. Any page or portion of the page left blank in the Question-cum-Answer Booklet must be clearly struck off.

All questions carry equal marks. The number of marks carried by a question/part is indicated against it.

Answers must be written in ENGLISH only.

Neat sketches may be drawn, wherever required.

### SECTION—A

1. Write short notes on the following in about 150 words each : 8×5=40
- (a) Staining of tissues for histological study
  - (b) Mechanism of coagulation of blood
  - (c) Drugs acting on fluids and electrolyte balance
  - (d) Effect of climate change on animal health and production
  - (e) Diagnosis and treatment of organophosphorus poisoning
2. (a) Define catecholamines and discuss their pharmacological effects. What is the clinical use and mode of action of dopamine? 15
- (b) Discuss the comparative features of locomotor apparatus and their application in biomechanics of mammalian body. 15
- (c) Describe different factors related to choice of an antimicrobial agent. 10
